Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

Availability of PatentIn Computer Program Training Friday, May 31, 1991 and Monday, July 1, 1991

The Patent and Trademark Office (PTO) has developed a computer program, called PatentIn, that will facilitate compliance with the Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures (sequence rules : 37 CFR 1.821 through 1.825). (Final rules were published in the Federal Register, 55 Fed. Reg. 18230 (May 1, 1990), and in the Official Gazette, 1114 O.G. 29 (May 15, 1990).)

Two one-day training sessions will be held on the use of the PatentIn Computer Program on Friday, May 31, 1991 and Monday, July 1, 1991 from 10:00 am to 4:00 pm. The training will be held at the Department of Agriculture Graduate School Training Facility. The School is located at 600 Maryland Ave., S.W., Washington, D.C. at the L'Enfant Plaza Metro stop.

The training will be hands on, using personal computer equipment and will include (1) the use of PatentIn to prepare the sequence listing file of information, and (2) the use of word processing software to prepare the PatentIn sequence listing file for inclusion as part of the application papers. The class will also include training on the basic file editing and manipulation skills that may be necessary for preparing sequence information for importing into PatentIn.

Because of the limited number of computers available, each class will be limited to no more than 17 participants.

Requests to attend the class should be made in writing, addressed to the Commissioner of Patents and Trademarks; Washington D.C. 20231; Attention: Arthur F. Purcell, Office of the Administrator for Documentation - Crystal Mall 2, Suite 300. Requests should include a check for $100, made payable to the Commissioner of Patents and Trademarks, or an authorization to charge a PTO Deposit Account. Requests authorizing charges to PTO Deposit Accounts may also be sent via facsimile to 703-557-0668. Any questions about the sequence rules or this notice should be directed to Arthur F. Purcell, by telephone at (703) 557-0400.

[Docket No. 910364-1064]

RIN 0651-AA47

Amendment to Interrogatory Practices

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Proposed rulemaking.

SUMMARY: The Patent and Trademark Office (PTO) proposes an amendment to § 2.120(d)(1) of the rules of practice in trademark cases, which limits the total number of interrogatories that may be served by one party upon another in a trademark interference, concurrent use, opposition, or cancellation proceeding. The proposed amendment shifts, from the responding party to the inquiring party, the burden of filing a motion to determine whether an assertion of an excessive number of interrogatories is well taken.

DATE: Written comments must be submitted on or before May 30, 1991 to ensure consideration.

ADDRESSES: Address written comments to Box 5, Trademark Trial and Appeal Board, Commissioner of Patents and Trademarks, Washington, DC 20231, marked to the attention of Janet E. Rice.

Written comments will be available for public inspection in room 1008, Crystal Square 5, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: Janet E. Rice by telephone at (703) 557-3551 or by mail marked to her attention and addressed to Box 5, Trademark Trial and Appeal Board, Commissioner of Patents and Trademarks, Washington, DC 20231.

SUPPLEMENTARY INFORMATION: In a notice of proposed rulemaking published in the **Federal Register** on March 7, 1989, at 54 FR 9514, and in the Patent and Trademark Office Official Gazette of March 28, 1989, at 1100 O.G. 137, the PTO proposed amendments to a number of the rules of practice in trademark cases. One of the proposed amendments pertained to § 2.120(d), which then consisted of a single paragraph relating to document production. It was proposed that the section be amended to include a new paragraph (designated "(1)" limiting the number of interrogatories that might be served by one party upon another in a trademark interference, concurrent use, opposition, or cancellation proceeding.

In response to the notice of proposed rulemaking, the PTO received numerous written comments pertaining to proposed § 2.120(d)(1). One individual commented that a party served with excessive interrogatories might make its own count of the questions, answer as many as were allowed under the proposed rule, and not answer the remainder on the ground that supernumerary questions were not authorized. To remedy this problem, the individual suggested that if the proposed rule were adopted, it might be advisable to add "a provision prescribing that relief for an excessive number of interrogatories is a protective order rather than an incomplete response to the interrogatories."

This suggestion, among others, was adopted in the final rule notice published in the **Federal Register** on August 22, 1989, at 54 FR 34886, and in the Patent and Trademark Office Official Gazette of September 12, 1989, at 1106 O.G. 26. Thus, final § 2.120(d)(1) included, as its last sentence, the following provision: "If a party upon which interrogatories have been served believes that the number of interrogatories served exceeds the limitation specified in this paragraph, and is not willing to waive this basis for objection, the party shall, within the time for (and instead of) serving answers and objections to the interrogatories, file a motion for a protective order, accompanied by a copy of the interrogatories which together are said to exceed the limitation."

In addition, the final rule notice indicated that the PTO would monitor the impact of § 2.120(d)(1) carefully and further amend the rule if necessary.

The effective date of the rule amendments specified in the final rule notice was November 16, 1989. Since that time, many attorneys have expressed the opinion, in public meetings relating to trademarks, that it is unfair for a party served with excessive interrogatories to have the burden of filing a motion for a protective order. These attorneys have suggested that the better practice would be to allow the responding party to simply object to the interrogatories on the ground of their excessive number, and leave the propounding party with the burden of filing a motion to compel, if it believes that the objection is not well taken.

Accordingly, § 2.120(d)(1) is proposed to be revised to substitute a motion to compel for the motion for a protective order.

Discussion of Specific Section Proposed To Be Changed

In this discussion, "Trademark Trial and Appeal Board" is abbreviated as "Board."

Section 2.120(d)(1) now provides, in part, that if a party upon which interrogatories have been served believes that the number of interrogatories served exceeds the limitation specified in the paragraph, and is not willing to waive this basis for objection, the party shall, within the time for (and instead of) serving answers and objections to the interrogatories, file a motion for a protective order, accompanied by a copy of the interrogatories which together are said to exceed the limitation. The paragraph is proposed to be revised to provide instead that if a party upon which interrogatories have been served believes that the number of interrogatories served exceeds the limitation specified in the paragraph, and is not willing to waive this basis for objection, the party shall, within the time for (and instead of) serving answers and specific objections to the interrogatories, serve a general objection on the ground of their excessive number. The paragraph is proposed to be further revised to add a requirement that if the party serving the interrogatories, in turn, files a motion to compel discovery, the motion must be accompanied by a copy of the set(s) of interrogatories which together are said to exceed the limitation, and must otherwise comply with the requirements of paragraph (e) of the section. Paragraph (e) governs motions to compel discovery in inter parties proceedings before the Board, and requires, inter alia, that a motion to compel be supported by a written statement from the moving party that such party or the attorney therefor has made a good faith effort, by conference or correspondence, to resolve with the other party or the attorney therefor the issues presented in the motion and has been unable to reach agreement.

Environmental, Energy, and Other Considerations

The proposed rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the proposed rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The rule change includes no additional or increased fees. Substantive rights to use trademarks are not adversely affected.

The Patent and Trademark Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers; individual industries; Federal, state or local government agencies; or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The rule change will not impose any additional burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et. seq.*

Notice is hereby given that pursuant to the authority contained in section 41 of the Trademark Act of July 5, 1946, 15 U.S.C. 1123, as amended, the Patent and Trademark Office proposes to amend part 2 of Title 37 of the Code of Federal Regulations by revising § 2.120(d)(1) as set forth below. Additions are indicated by arrows (> <) and removals by brackets ([]).

PART 2—RULES OF PRACTICE IN TRADEMARK CASES

1. The authority citation for 37 CFR part 2 would continue to read as follows:

Authority: 15 U.S.C. 1123; 35 U.S.C. 6, unless otherwise noted.

2. Section 2.120 is proposed to be amended by revising paragraph (d)(1) to read as follows:

§ 2.120 Discovery.

. . . . .

(d) *Interrogatories; request for production.* (1) The total number of written interrogatories which a party may serve upon another party pursuant to Rule 33 of the Federal Rules of Civil Procedure, in a proceeding, shall not exceed seventy-five, counting subparts, except that the Trademark Trial and Appeal Board, in its discretion, may allow additional interrogatories upon motion therefor showing good cause, or upon stipulation of the parties. A motion for leave to serve additional interrogatories must be accompanied by a copy of the interrogatories, if any, which have already been served by the moving party, and by a copy of the interrogatories proposed to be served. If a party upon which interrogatories have been served believes that the number of interrogatories served exceeds the limitation specified in this paragraph, and is not willing to waive this basis for objection, the party shall, within the time for (and instead of) serving answers and >specific< objections to the interrogatories, [file a motion for a protective order, accompanied by a copy of the interrogatories which together are said to exceed the limitation.] >serve a general objection on the ground of their excessive number. If the inquiring party, in turn, files a motion to compel discovery, the motion must be accompanied by a copy of the set(s) of interrogatories which together are said to exceed the limitation, and must otherwise comply with the requirements of paragraph (e) of this section.<

Advisory Commission on Patent Law Reform
Request for Comments

On March 26, 1991, the Assistant Secretary of Commerce and Commissioner of Patents and Trademarks convened the first meeting of the Advisory Commission on Patent Law Reform. The Commission will be submitting a report to the Secretary of Commerce by August 1992 on the state of, and the need for, any reform in the United States patent system. At the March meeting, the Commission identified several issues (listed below) which will be addressed in the report.

To assure that the recommendations of the Commission represent a true consensus of the American public and the patent user community, the Commission hereby invites public comments upon the issues set forth below.

Each issue should be individually addressed. Submissions should be concise statements of position, including supporting material where relevant, and limited to the questions framing each issue. All submissions must include the name and/or professional affiliation of the contributor.

To ensure full consideration, the submissions should be received by July 15, 1991. Please forward all submissions to:

E. R. Kazenske
Executive Assistant to the Commissioner
U.S. Patent and Trademark Office
Box 15
Washington, D.C. 20231

Summary of issues upon which public commentary is invited:

I. Protection of Computer Related Inventions

The principal issue to be examined is whether the current U.S. patent laws provide adequate and appropriate protection of novel computer program-related inventions. The relationship of patent protection for computer program-related inventions to other forms of intellectual property protection will also be considered.

a) What problems, if any, exist in the current framework of laws which protect computer-related inventions?

b) What changes, if any, should be made in the domestic and international systems for protection of computer-related inventions?

c) The Supreme Court has found that new and useful computer program-related inventions are eligible for patent

protection. What rationale, if any, exists in law or policy for Congress to now remove patent protection for this field of science and technology?

d) What evidence exists, if any, that patents issued on new and useful computer program-related inventions do or do not provide an incentive to conduct research and development on new products, and that such patents do or do not promote the development of new technology?

e) What conflict or overlap is created by the existence of a patent for a new and useful computer program-related invention and either (1) a copyright for original expression embodied in the computer program fixed therein, or (2) a mask work in the invention; and if any exists, is it harmful or helpful?

f) Should Congress legislate the boundary for patents in the computer program area, or is it preferable to permit the courts to continue to define the outer boundary?

g) Are the tests of patentability for computer program-related inventions implemented by the USPTO in the notice published in the *Official Gazette* on August 9, 1989, consistent with the patent statute and/or court decisions? If there are inconsistencies, what are they?

h) What concrete steps should be taken, if necessary, to revise the PTO examination procedure for computer program-related inventions in order to achieve high-quality issued patents, particularly with respect to:

1. Providing patent examiners with complete, up-to-date prior art;

2. Providing patent examiners with training in this field to raise/maintain their expertise;

3. Recognizing computer science as a "science" for the purpose of qualification to take the PTO registration examination and recruiting computer scientists as patent examiners;

4. Providing an optimum system of classification to maximize the searchability of inventions in this field; and

5. Taking steps to reduce the PTO pendency time for patent applications in this field?

i) What procedures, not currently available, should be considered to correct problems caused by improperly granted patents (i.e., post grant oppositions, court nullification), and how would these procedures

particularly relate to computer program-related inventions?

II. Federal Protection for Trade Secrets

Trade Secret statutes now exist only at the state level, and are not uniform in the states wherein they exist. The principal issue to be examined is whether Federal statutory protection should be enacted and if so, how it should relate to state statutes.

a) Is there a need for a Federal law on trade secrets? What problems have been caused by the absence of such a law? What problems would such a law create?

b) If there is need for a Federal trade secrets law, on what legal theories (i.e., tort, contract, etc.) should it be based? How should it relate to state laws and to what extent, if any, should it preempt state laws?

c) If there are specific areas of trade secrets that are inadequately protected by present state laws or by their nature cannot be adequately protected by state laws, would it be possible to enact Federal laws in those areas only, leaving to state law what is currently adequately protected? Would such a bifurcated system create more problems that it would solve?

III. Cost and Complexity of Patent Enforcement

Although many patents are enforced through negotiation, resort is frequently made to either litigation in the Federal district courts, or to arbitration or one of several other forms of alternative dispute resolution (ADR). Patent litigation is said to be complex, expensive, unpredictable and heavily dependent on the ability of the judge to exert fair and effective control. Arbitration and other forms of ADR would seem to offer significant advantages in many types of dispute, but are not frequently used.

a) Is the cost of patent enforcement too high? If so, what can be done within the existing Federal Rules to achieve determinations of validity, infringement and damages more efficiently and economically? Which, if any, of the Federal Rules should be changed to improve patent litigation, and how? Would provisions in the Civil Justice Reform Act of 1990 improve patent litigation?

b) Is there a need for a "small claims" type of patent proceeding in the Federal courts, with simplified procedures and limited recovery? If so, describe the characteristics such a proceeding should have, e.g., how

procedures would be simplified, what the limits on recovery should be, etc.

c) Should the use of arbitration and other forms of ADR be increased? How? What, if any, deterrents are there to using ADR and how can they be overcome? What additional forms of ADR should be considered for patent disputes?

IV. Grounds for Holding Patents Unenforceable

In the United States, a party charged with infringement of a patent can raise an equitable defense of unenforceability which, if sustained, may preclude exercise of the patent rights even though the patent is valid and infringed. Historically, the defense has usually been based on alleged misconduct occurring after the patent is granted, e.g., restrictive conditions in patent licensing agreements. In more recent years, conduct before the Patent and Trademark Office has frequently been claimed to give rise to the defense, e.g., misrepresentations or alleged failure to comply with the standard for disclosing to the Office information in the patent applicant's possession. Such claims, some argue, are often frivolous and unsupported.

a) What are the benefits and drawbacks of permitting an unenforceability defense in patent litigation, based on alleged misconduct either before or after patent grant?

b) Should any change be made in the present Patent and Trademark Office standard relating to the submission of prior art information, recognizing the need of the Office to consider information bearing on patentability before the patent issues?

c) Are existing judicial procedures and standards for resolving unenforceability defenses adequate? If not, is legislation desirable and, if so, what kind? Discuss any other changes believed desirable.

d) Once inequitable conduct has been found, whether based on conduct before or after grant, is unenforceability the appropriate remedy? If not, what other types of remedies might be applied and in what types of situations?

V. Licensee Challenges to Patent Validity

Since 1969, when the U.S. Supreme Court in Lear v. Adkins, 395 U.S. 653, abrogated the doctrine of licensee estoppel, the courts have been dealing ad hoc with a variety of issues flowing from that decision. These include the right of the patent owner to terminate the license agreement and sue for patent infringement, the right of the licensee to recover

royalties should the patent be declared invalid, the extent to which the parties should be permitted to contract in advance for the various eventualities, etc.
It is asserted by some that this has created considerable uncertainty. Some would provide for all post-Lear eventualities by statute. Others would permit a licensor and licensee to bargain for provisions necessary to protect their respective interests.

a) Is legislation desirable to clarify the results of the Lear decision? If so, what should it provide?

b) Should any restraints, beyond the normal law of contracts, be imposed on the rights of licensee and licensor to bargain for the results of a potential challenge by the licensee of the licensed patent's validity?

VI. First-to-File System

In the United States patent system, when more than one patent application is filed claiming the same invention, the patent is awarded to the applicant who establishes the earliest acts of invention in the United States and who has not thereafter suppressed, abandoned or concealed his invention ("first-to-invent" system). In international treaty negotiations aimed at more uniform patent laws throughout the world, particularly the World Intellectual Property Organization (WIPO) patent harmonization proceedings, the United States is being urged to adopt a different procedure, almost universally used in other countries, under which we would award the patent to the first applicant to file a patent application for the invention ("first-to-file" system). The principal issue presented is whether the United States should change from a first-to-invent procedure to a first-to-file procedure (1) only as part of a comprehensive treaty to harmonize all of the world's patent systems, (2) without regard to a harmonization treaty, or (3) not at all. The following questions are designed to help frame this issue:

a) What benefits do United States patent holders and the public realize from the first-to-invent procedure? What detriments are there, particularly those that might not be addressed by further simplification of the procedure to determine priority of inventorship?

b) What benefits are United States patent holders and the public expected to realize from a first-to-file procedure? What detriments should be expected?

VOL 1126 ISS 3 MAY 21 1991 UMI

c) What benefits are United States patent holders and the public expected to realize from a harmonization treaty? What detriments should be expected?

d) If the United States retains the first-to-invent procedure, a partial step toward harmonization could be a change permitting applicants to establish dates of invention by reference to knowledge, or use, or other activity in foreign countries in addition to such activities in the United States. Should such an expansion of admissible evidence of inventorship be adopted (1) only as part of a comprehensive treaty to harmonize all of the world's patent systems, (2) without regard to a harmonization treaty, or (3) not at all? Should such an expansion of admissible evidence of inventorship be adopted (1) only in respect to foreign countries that provide for practicable and effective judicial discovery of foreign inventorship activity, (2) only on a limited basis reflecting credibility of the foreign evidence, or (3) without regard to the legal procedures available in foreign countries?

e) If the United States adopts a first-to-file procedure, should it condition this adoption on a grace period during which activities of the inventor or derived through the inventor will not be a bar to patentability by the inventor? Should the oath and its attendant sanctions be strengthened in respect to the requirement of originality?

f) If the United States adopts a first-to-file procedure, would it be desirable to codify the rights, if any, of a prior user of the invention? If so, should such a user have (1) no defense or rights in respect to the subsequent patent, (2) a personal exemption to continue existing commercial use, or (3) some other right? Should the prior user rights, if any, extend to one not an actual user, but who has made effective and serious preparations for such use? Should it matter if the prior user had elected to practice the invention as a trade secret? Should any prior user right be transferrable to someone else? Should any such right extend only to use in the United States (a feature in other patent systems)? Should any prior user right extend to such users who were not originators of the invention?

g) Would a first-to-file patent procedure run afoul of the reference to "inventors" in Article I, Section 8, Clause 8 of the *Constitution*?

VII. Automatic Publication of Applications

In the United States patent system, patent applications are held in confidence by the Patent and Trademark Office and not published until a patent is granted. Patent rights begin on the date of grant. In international treaty negotiations aimed at more uniform patent laws throughout the world, it has been proposed that patent applications be published and confer provisional protection commencing on the date of publication. The Japanese and European patent systems provide for publication of patent applications 18 months after their effective filing dates and feature provisional protection, generally a right to compensation from infringers with actual notice. The principal issue is whether United States patent applications should be published before grant of a patent (1) only as part of a comprehensive system to harmonize all of the world's patent system, (2) without regard to a harmonization treaty, or (3) not at all. The following questions are designed to help frame this issue:

a) What benefit do United States patent holders and the public realize from keeping patent applications confidential until a patent is granted? What are the detriments?

b) What benefits are United States patent holders and the public expected to realize from a procedure requiring automatic publication of patent applications? What are the detriments?

c) Should U.S. patent applications be published by some fixed time measured from their U.S. or foreign priority filing dates? Does the need for a pre-grant publication differ depending upon whether patent terms are measured from filing date or issue date?

d) If pre-grant publication becomes part of the U.S. patent system, is there a need for provisional protection starting from the date of publication? Does the need for provisional protection depend upon how the term of the patent is measured?

e) If provisional protection is appropriate, what should it include?

VIII. Patent Term

In the United States patent system the term of a patent is 17 years from the date when the patent is granted. Many other countries provide a 20-year term for their patents from the date when the application for the patent was filed. The appropriate term for a patent is under consideration in

negotiations aimed at more uniform patent laws throughout the world, as well as in the negotiations on the Trade-Related Aspects of Intellectual Property (TRIPs) in the current General Agreement on Tariffs and Trade (GATT) Round. The principal issue is whether the United States should measure the life of a patent from the date when the application for it was filed (1) only as part of comprehensive treaties to harmonize all of the world's patent systems, (2) without regard to harmonization treaties, or (3) not at all. The following questions are designed to help frame this issue.

a) What benefits do United States patent holders and the public realize from measuring the life of a patent from its date of grant? What detriments are there?

b) What benefits are United States patent holders and the public expected to realize from a procedure that would measure the life of a patent from its filing date? What would the detriments be?

c) If the term of a United States patent is to be measured from the filing date, should the term be extended to compensate for delays due to (1) secrecy orders, (2) marketing delays due to FDA or EPA regulatory procedures, (3) NASA or DOE ownership proceedings, (4) appeals, or (5) any other delays outside of the control of the patent applicant?

d) Should a United States patent application be permitted to rely upon the date of more than one foreign-filed application for priority, and, if so, should the term of the United States patent be measured from the earliest priority date (recognizing that a modification of the Paris Convention probably would be necessary for adoption of any procedure to measure the life of a patent from any foreign priority date)?

e) If the term of a United States patent is to be measured from a filing date, should that date be (1) the earliest United States filing upon which priority is based, (2) the earliest filing upon which priority is based, be it a foreign or United States filing date, or (3) the filing date of the application on which the patent is granted?

f) If the United States adopts a patent term based upon a filing date, should that term be 20 years? If not, how long should the term be?

IX. Deferred Examination

United States patent laws permit an applicant to petition for a deferral of the examination process only for a short period, and then only for "good and sufficient cause." Deferred examination at the option of the applicant is a feature of several foreign patent systems.

a) What would be the benefits of a procedure whereby a patent application is not examined in due course, but instead, the applicant is given the option, for a period of years, to request that the application be examined? What would be the detriments?

b) If optional deferred examination were adopted, what necessary or desirable companion changes (such as mandatory publication of applications) should be made, if any, in the United States patent law or procedures? Should a third party have the right to request examination?

c) If optional deferred examination were adopted, should a patent application be deemed abandoned if the applicant fails to request examination within a fixed time after filing? Should the applicant be permitted thereafter to re-file an application for the same invention?

d) Should the applicant have the option, in lieu of requesting formal examination, to obtain a lower-cost patent of shortened term and reduced enforcement rights?

X. In re Hilmer

Under the interpretation of United States patent law in the case of In re Hilmer (and other cases), a United States patent has a patent-defeating effect (becomes a "reference") as of the earliest filing date in the United States to which it is entitled, but not the earliest foreign filing date to which it is entitled. In other patent systems, patents or applications are effective as references as of their earliest filing date, be it domestic or foreign.

a) If the effective date of a United States patent as a reference should be based on a foreign application filing date, should that foreign priority date be the effective date for anticipation purposes only and not for obviousness purposes so that the Hilmer rule is partially retained in that the United States patents with a foreign priority date are effective only as a reference for obviousness purposes as of the filing date in the United States?

VOL 1126 ISS 3 MAY 21 1991 UMI

b) Is there rationale for abolishing the Hilmer rule totally so that foreign-origin United States patents will be effective as references for all purposes as of their foreign priority filing dates?

c) What changes in procedure, if any, should the Patent and Trademark Office adopt to ensure adequate consideration of the disclosures in foreign-origin United States patents in the examination of United States patent applications?

d) Should bilateral reciprocity be applied when deciding whether or not a United States patent is entitled to an earlier foreign filing priority date in a particular country for reference purposes?

XI. Reexamination

The reexamination statute permits any person to file, with the requisite fee, a request for the reexamination of a patent in view of prior art limited to prior patents and printed publications. Issues of inequitable conduct, public use and sale, and the like, may not be addressed in reexamination. If the USPTO determines that the request raises "a substantial new question of patentability," the patent is reexamined under the same procedures applicable to the examination of new applications and concludes with the issuance of a reexamination certificate. The reexamination process is basically *ex parte* in nature, with very limited participation by a third party requestor. Since the present system of reexamination was established by Congress in 1980, there have been numerous proposals to modify reexamination to increase the degree of participation of the requestor and/or to enlarge the scope of reexamination.

a) Do you believe the present reexamination system is working effectively? If not, identify each deficiency that you believe exists in the system.

b) Do you believe that the present reexamination system should be modified to permit complete *inter partes* participation by a protestor at all phases of the reexamination proceeding? If so, explain why. If not, explain why.

c) If your answer to question b) is "no," to what extent, if any, should third parties be allowed greater participation than at present in reexamination proceedings?

d) Would you be in favor of modifying the present reexamination system to permit or require one or more of the following:

(1) Permitting a reexamination petitioner other than the patentee to comment on any claims in their finally allowed form, so as to provide the examiner with the petitioner's views prior to a final decision as to whether to issue a reexamination certificate?

(2) Permitting a reexamination petitioner to appeal both to the PTO Board of Patent Appeals and Interferences and to the Federal Circuit from any final decision favorable to a patentee in a reexamination proceeding?

(3) Conditioning the appeal noted in subparagraph (2) on the petitioner's agreement to forego litigating in any other forum any issue raised or which could have been raised on appeal?

(4) Precluding an accused infringer from relying as a defense on any prior art of printed publication unless that prior art or printed publication has been previously considered by the PTO either during the original prosecution of a patent or in a reissue or reexamination proceeding involving that patent?

(5) Precluding a party or its privies, against whom a judgment of invalidity of a patent claim or claims has been entered, from seeking or maintaining reexamination of that claim or claims?

(6) Requiring that claims of a reexamined application be construed under the same standards as those claims would be construed in a district court infringement proceeding?

e) Should the scope of issues considered by the examiner during reexamination be broadened? If so, how (e.g., by permitting consideration of public use or on sale bars, Section 112 issues, inequitable conduct, etc.)?

f) In what other ways, if any, should reexamination proceedings be changed?

XII. Assignee Filing of Applications

The United States currently requires the actual inventor or inventors to file patent applications, subject to a few limited exceptions such as death, unavailability, or insanity. Each application must be accompanied by an oath from the actual inventor which states that the applicant believes he was the first to invent the claimed invention. Nearly all foreign patent systems permit the owner of an invention (whether the actual inventor or the assignee) to

file the patent application without an oath signed by the inventor.

a) Should the United States allow filing of patent applications by assignees?

b) What benefits and drawbacks would occur by allowing filing of patent applications by assignees?

c) What contours should an assignee filing proposal have, including possible safeguards for inventors and the public?

XIII. PTO Funding and Fee Structure

The Patent and Trademark Office historically recovered its costs through a combination of fees and funding from general tax revenues. The major patent fees are filing fees, and issue and maintenance fees in a two-tier system with lower rates for small entities. These fees have undergone substantial increases recently as Congress and the Administration have changed from a policy under which applicants and patent owners paid only a portion of these costs to one under which they pay full costs.

a) What impact, if any, will a system in which PTO costs are almost entirely user-fee funded have on (1) U.S. inventors generally, (2) on small entities, including independent inventors, and (3) the public?

b) What realistic and practical alternatives can you suggest, other than user-fee funding, for funding PTO operations?

c) Congress historically has provided fiscal oversight for the PTO. Will this attention by Congress continue at the same level in the absence of a significant allocation of taxpayer funds and, if not, what other fiscal oversight is appropriate?

d) Should the more public-oriented functions of the PTO, e.g., public search room operations, be funded by user fees, or should such operations be supported by appropriated funds?

e) Would it be desirable to increase the average application pendency time in the PTO to a level above 18 months if such increase permitted a significant reduction in PTO fees?

f) What are the advantages and disadvantages of retaining a two-tier fee structure?

g) Should large entities subsidize small entities in a two-tier structure, or should public funds be used to supplement small entity fees?

h) As part of a two-tier fee structure, what would the pros and cons be of (1) redefining a small entity to include fewer than 500 employees, (2) providing a tax credit (e.g., 50%) in lieu of part or all of the 50% subsidy for small entities, (3) denying 50% subsidy benefits, on a need basis, to small entities who receive a defined minimum (e.g., $200,000) in technology transfer fees during the preceding year, and (4) imposing a flat (e.g., 10%) across-the-board fee increase if this permitted the continuance of the current small entity reduced fee structure?

i) A major current cost of the PTO is that of automating the search files and system. How should this cost be recovered, if not through fees?

j) Is there a mechanism in the Government for long-term investments, such as computer equipment, to be capitalized and paid off over their useful life? Would it be possible and desirable to have such investments paid for by a bond over a period of years (e.g., 20 years) instead of by user fees?

k) Should the current relation among filing, issue and maintenance fees be changed and, if so, how? Are there other fee strategies which will better balance the need to recover costs and the need to keep the patent system accessible to inventors?

l) In discussions of patent harmonization, the question of pre-issuance publication of U.S. patents has been raised. Given the possible reluctance of Congress to fund the costs of such publication from general revenues, would you support such publication if its cost were totally user-funded?

[Docket No. 910373-1073]

RIN 0651-AA45

Revision of Patent and Trademark Fees

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Patent and Trademark Office (PTO) proposes to amend the rules of practice in patent and trademark cases, parts 1 and 2 of title 37, Code of Federal Regulations, to adjust certain patent and trademark fee amounts and to amend certain procedures in accordance with the applicable provisions of H.R. 1613.

In brief, the PTO is proposing to establish a two-year fee cycle for fiscal years 1992 and 1993. During the 1992–1993 fee cycle, fees set under 35 U.S.C. 41 (a) and (b) would remain at the present level. Fees set under 35 U.S.C. 41(d), 35 U.S.C. 376, and section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), would be adjusted. The small entity subsidy would be continued, but would apply only to patent application filing fees.

DATES: Written comments must be submitted on or before June 12, 1991; a public hearing will be held on June 12, 1991, at 9 a.m. Requests to present oral testimony should be received on or before June 11, 1991.

ADDRESSES: Address written comments and requests to present oral testimony to the Commissioner of Patents and Trademarks, Washington, DC 20231, Attention: Frances Michalkewicz, suite 507, Crystal Park 1, or by FAX to (703) 557–8664. The hearing will be held in suite 912 on the 9th floor of Building 2, Crystal Park, located at 2121 Crystal Drive, Arlington, Virginia. Written comments and a transcript of the hearing will be available for public inspection in suite 507 of Building 1, Crystal Park, at 2111 Crystal Drive, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Frances Michalkewicz by telephone at (703) 557–1610 or by mail marked to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, DC 20231.

SUPPLEMENTARY INFORMATION: This proposed rule change is designed to adjust the Patent and Trademark Office fees in accordance with the provisions of H.R. 1613.

Patent and trademark fees were set on October 1, 1982, in accordance with the provisions of title 35, United States Code, and the provisions of section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113).

On November 5, 1990, the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101–508) imposed a 69 percent surcharge on all patent fees set under 35 U.S.C. 41 (a) and (b). Section 10101 of Public Law 101–508 requires the Commissioner to make recommendations for any statutory changes necessary to implement new fee proposals. Furthermore, the PTO's authorizing legislation (Pub. L. 100–703) will expire on September 30, 1991. Legislation to authorize appropriations for the Patent and Trademark Office for fiscal years 1992 and 1993 and for other purposes has been introduced as H.R. 1613.

Background

Statutory Provisions

Patent fees are authorized by 35 U.S.C. 41 and 35 U.S.C. 376. Subsections 41 (a) and (b) of title 35, United States Code, establish a number of statutory fees. Among them are fees for filing a patent application, issuing a patent, and maintaining a patent in force.

Section 10101 (a) of Public Law 101–508 imposes a 69 percent surcharge on all fees authorized by 35 U.S.C. 41 (a) and (b), effective November 5, 1990. Section 1(c) of H.R. 1613 would require the Commissioner to keep section 41 (a) and (b) fees at this level.

Section 41(h) of title 35, United States Code, authorizes the 50 percent reduction in the fees paid under 35 U.S.C. 41(a) and 35 U.S.C. 41(b) by independent inventors, small business concerns, and nonprofit organizations, who meet the prescribed definitions. Section 4(d) of H.R. 1613 would amend 35 U.S.C. 41(h) to apply the 50 percent reduction only to patent application filing and claim fees when those fees are paid upon filing the application.

Section 4(a) of H.R. 1613 would amend 35 U.S.C. 41(d) to allow the Commissioner to establish fees for all other processing, services, or materials related to patents and not specified in 35 U.S.C. 41(a) and (b) to recover, in the aggregate with other revenues, the estimated cost of the operations of the PTO.

Section 376 of title 35, United States Code, authorizes the Commissioner to set fees for patent applications filed under the Patent Cooperation Treaty. H.R. 1613 makes no modifications to 35 U.S.C. 376.

Section 4(b) of H.R. 1613 would amend subsection 41(f) of title 35, United States Code, to provide that all fees set under 35 U.S.C. 41(a) and (b) may be adjusted every two years beginning October 1, 1993, by fluctuations in the Consumer Price Index (CPI) over the previous two years.

Section 4(c) of H.R. 1613 would amend subsection 41(g) of title 35, United States Code, to allow new fee amounts established after October 1, 1991, to take effect thirty days after notice in the **Federal Register.**

Section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), authorizes the Commissioner to establish fees for the filing and processing of an application for the registration of a trademark or other mark, and for all other services and materials relating to trademarks and other marks. The current section 31 also precludes any fee for the filing or processing of an application for the registration of a trademark or other mark or for the renewal or assignment of a trademark or other mark from being adjusted more than once every three years.

Section 42(c) of title 35, United States Code, provides that trademark fees available to the Commissioner are to be used exclusively for the processing of trademark registrations and for other services and materials related to trademarks. Section 4(f) of H.R. 1613 would modify 35 U.S.C. 42(c) so that trademark fees could be used to support a fair share of trademark-related activities including administrative, legislative, international and outreach programs that to date have been funded from taxpayer revenues. Trademark fees could be reprogrammed for other authorized PTO activities not specified above only upon compliance with the guidelines for reprogramming set forth in the Department of Commerce's annual appropriations act.

Section 4(g) of H.R. 1613 would allow trademark fees to be adjusted every two years, and after October 1, 1991, would allow new fee amounts to take effect thirty days after notice in the **Federal Register.**

General Procedures

Recovery Level Determinations

The PTO proposes to recover its operating costs for fiscal years 1992 and 1993 as stated in the President's Fiscal Year 1992 Budget. The budget request for fiscal year 1992 totals $461,790,000 and the estimate for fiscal year 1993 totals $554,899,000. Recovery levels were guided by OMB Circular A–25, "User Fees," and OMB Circular A–130, "Management of Federal Information Resources."

Workload Projections

Determination of future year workloads varies by fee code. Principal workload projection techniques are as follows:

Patent and trademark application workloads were projected from statistical regression models using recent application trends. Patent issues are projected from an in-house patent productivity model and reflect examiner production achievements and goals. Patent maintenance fee workloads utilize patents issued 3.5, 7.5 and 11.5 years prior to payment and assume payment rates of 80 percent, 50 percent and 25 percent, respectively. Trademark affidavit projections are based on filing trends for marks registered five to six years prior. Trademark renewal projections are based on marks registered 20 years prior to 1989. Service fee workloads follow linear trends from prior year activities. Workload estimates are calculated by the Office of Budget and the office responsible for the fee activity.

Income Projections

For each patent statutory fee, the amount of each fee set forth in the **Federal Register** of November 26, 1990, at 55 FR 49040 was multiplied by the projected workload for 1992 and 1993 to project the income from that fee item during the two-year period. The sum of the projected incomes from all patent statutory fees for the two-year period was subtracted from the two-year budget requests of $913,433,000 for patents. The result was the amount that would have to be recovered from patent non-statutory fees and Patent Cooperation Treaty fees.

Section 4(a) of H.R. 1613, along with 35 U.S.C. 376, would allow the PTO to set fees to recover in the aggregate with revenues projected to be generated from patent statutory fees, the estimated cost of patent operations for the two-year period, 1992–1993. Each of the proposed fee amounts was multiplied by the projected workload during the fee cycle to project the income from that fee item. The sum of revenues projected to be generated from patent statutory fees, patent non-statutory fees, and Patent Cooperation Treaty fees equals the President's Budget request for patents for fiscal years 1992 and 1993.

Section 4(g) of H.R. 1613 would allow the PTO to set trademark fees to recover the estimated cost of the trademark operations for the two-year period, 1992–1993. The two-year budget request for trademarks is $99,956,000.

A comparison of existing and proposed fee amounts is included as an Appendix to this proposed notice.

Any fee amount that is paid on or after October 1, 1991, would be subject to the new fee schedule. Under H.R. 1613, the small entity subsidy would be continued, but would apply only to patent application filing and claims fees. Fees set in 35 U.S.C. 41(a)(1) for additional claims would be subject to reduction for small entities only if the additional claims were included in the application as filed. No small entity reduction would apply for claims presented later than on filing the application. Fee amounts established by 35 U.S.C. 41(a)(2), (a)(3)(c), (a)(3)(d), (a)(5)–(a)(8), and 41(b) that are paid on or after October 1, 1991, would no longer be reduced by 50 percent for small entities.

For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing, where authorized under 37 CFR 1.6, will be considered to be the date of receipt in the PTO. A "Certificate of Mailing under section 1.8" is not "proper" for items which are specifically excluded from the provisions of § 1.8. Section 1.8 should be consulted for those items for which a Certificate of Mailing is not "proper." Such items include, inter alia, the filing of national and international applications for patents and the filing of trademark applications. The provisions of 37 CFR 1.10 relating to filing papers and fees with an "Express Mail" certificate, however, do apply to any paper or fee (including patent and trademark applications) to be filed in the PTO. If an application or fee is filed by "Express Mail" with a proper certificate dated on or after the effective date of the rules, the amount of the fee to be paid is the fee established herein if a change is being made in the fee. In order to ensure clarity in the implementation of the fee proposals, a discussion of specific sections is set forth below.

Discussion of Specific Rules

37 CFR 1.12 Assignment Records Open to Public Inspection

Section 1.12, paragraph (a), if amended as proposed, would change the reference for payment of a fee to § 1.19(b)(3), and add a reference to the fee set in the trademark rules at § 2.6(b)(5). Section 1.12, paragraph (d), if amended as proposed, would change the reference for payment of a fee to § 1.21(j), and add a reference to the fee set in the trademark rules at § 2.6(b)(10).

37 CFR 1.13 Copies and Certified Copies

Section 1.13, if amended as proposed, would revise paragraph (b) to be consistent with proposed revisions to paragraphs 1.19(b) and 2.6(b).

37 CFR 1.16 National Application Filing Fee

Section 1.16, paragraphs (b)–(d), (i) and (j), if revised as proposed, would clarify that the reduced fee amounts to be paid by a small entity are applicable only when the claims are filed with the original application. Fees for presentation of claims in an original application later than on filing are set forth in proposed new 37 CFR 1.17 (p) and (q).

Section 1.16, paragraph (e), if revised as proposed, would adjust the patent application surcharge fee as authorized by section 4(a) of H.R. 1613, and would eliminate the two-tier fee structure, as authorized by section 4(d) of H.R. 1613. All applicants would pay the same fee amount.

37 CFR 1.17 Patent Application Processing Fees

Section 1.17, paragraphs (a)–(g), (l) and (m), if revised as proposed, would eliminate the two-tier fee structure as authorized by section 4(d) of H.R. 1613. All applicants would pay the same amount.

Section 1.17, paragraphs (h)–(k) and (n)–(o), if revised as proposed, would adjust the fee amounts as authorized by section 4(a) of H.R. 1613.

Section 1.17, if revised as proposed, would add new paragraphs (p) and (q).

Proposed new paragraph (p) would set forth fees for presentation to claims in an original application later than on filing.

Proposed new paragraph (q) would set forth fees for presentation of claims in a reissue application later than on filing.

37 CFR 1.18 Patent Issue Fees

Section 1.18, if revised as proposed, would eliminate the two-tier fee structure as authorized by section 4(d) of H.R. 1613. All applicants would pay the same amounts.

37 CFR 1.19 Document Supply Fees

Section 1.19, if revised as proposed, would establish that the Office would sell certified or uncertified copies of documents at the same flat fee. Most requests for documents are for certified copies. Customers who need uncertified copies of documents or copies of

portions of documents also would be able to make those copies themselves at a self-service copy charge, per page. The Office no longer would compare and certify documents that were not made by Office staff.

Section 1.19, subparagraph (a)(1), if revised as proposed, would adjust the fee amount as authorized by section 4(a) of H.R. 1613. Subparagraph (a)(1), if revised as proposed, also would clarify and set fees for different levels of service available for obtaining copies of patents in black and white. In addition to regular service, the PTO would provide for expedited local service to be fulfilled within one workday for orders delivered to the Public Service Window at double the fee amount set for regular service; and expedited service via electronic ordering service and delivered by overnight express delivery service as previously provided by subparagraph (a)(6). There are two Public Service Windows at the PTO: One in the Patent Search Room and another in the Trademark Search Library. Unless otherwise requested, copies of patents would be delivered to the Public Service Window in the Patent Search Room.

Section 1.19, subparagraph (a)(2), if revised as proposed, would adjust the fee amount as authorized by section 4(a) of H.R. 1613, and delete reference to copies of statutory invention registrations, which would be provided by renumbered subparagraph (a)(3).

Section 1.19, if revised as proposed, would delete existing subparagraph (a)(3). In the future, the PTO only would provide certified or uncertified copies of documents at a flat fee, as set forth in renumbered subparagraph (b)(3).

Section 1.19, renumbered subparagraph (a)(3), if revised as proposed, would clarify and set fees for different levels of service available for obtaining copies of utility patents or statutory invention registrations containing color drawings. In addition to regular service, the PTO would provide for expedited local service to be fulfilled within one work day for orders delivered to a Public Service Window at double the fee amount set for regular service.

Section 1.19, if revised as proposed, would delete subparagraphs (a)(5) and (a)(6). The service formerly provided under subparagraph (a)(5) would be provided under subparagraphs (a)(1)(ii) and (a)(2)(iii), and the service formerly provided under subparagraph (a)(6) would be provided under (a)(1)(iii).

Section 1.19, subparagraph (b)(1), if revised as proposed, would adjust the fee amount as authorized by section 4(a) of H.R. 1613, and also clarify and set fees for different levels of service available for obtaining certified copies of patent applications as filed. In addition to regular service, the PTO would provide for expedited service, fulfilled within five work days, excluding mailing time, at double the fee amount set for regular service.

Section 1.19, subparagraph (b)(2), if revised as proposed, would reduce the fee for providing a certified or uncertified copy of a patent file wrapper and contents.

Section 1.19, if revised as proposed, would delete subparagraphs (b)(3) and (b)(4). Certified or uncertified copies of Office records would be provided under the renumbered (b)(3). Expedited service as currently provided under subparagraph (b)(4) would be provided under subparagraph (b)(1)(ii).

Section 1.19, if revised as proposed, would renumber subparagraph (b)(5) as (b)(3), and adjust the fee amount as authorized by section 4(a) of H.R. 1613. Section 1.19, subparagraph (b)(3), if revised as proposed, would establish that the PTO provides copies of certified documents, but does not certify documents provided by the public.

Section 1.19, if revised as proposed, would renumber subparagraph (b)(6) as (b)(4) and would adjust the fee amount as authorized by section 4(a) of H.R. 1613.

Section 1.19, paragraphs (d)–(f), if revised as proposed, would adjust the fee amounts as authorized by section 4(a) of H.R. 1613.

Section 1.19, if revised as proposed, would delete paragraph (g) because the PTO no longer would certify copies that are not prepared by the PTO.

Section 1.19, if revised as proposed, would renumber paragraph (h) as (g), and adjust the fee amount in renumbered paragraph (g) as authorized by section 4(a) of H.R. 1613.

37 CFR 1.20 Post-Issuance Fees

Section 1.20, paragraphs (a)–(c), if revised as proposed, would adjust the fee amounts as authorized by section 4(a) of H.R. 1613.

Section 1.20, paragraph (d), if revised as proposed, would eliminate the two-tier fee structure as authorized by section 4(d) of H.R. 1613. All would pay the same amounts.

Section 1.20, paragraphs (e)–(g), if revised as proposed, would adjust the fee amounts as authorized by section 4(a) of H.R. 1613 to make them comparable to the amounts established by § 41(b) and set forth in the **Federal Register** of November 26, 1990, at 55 FR 49040 under 37 CFR 1.20(h)–(j), respectively.

Section 1.20, paragraphs (e)–(g), if revised as proposed, would provide for the payment of maintenance fees on original and reissue patents, except design or plant patents, based on all applications filed on or after December 12, 1980. Paragraphs (e)–(g) formerly provided for the payment of maintenance fees on original and reissue patents, except design or plant patents, based on applications filed on or after December 12, 1980, but before August 27, 1982. Paragraphs (h)–(j), which are proposed to be deleted, provided for the payment of maintenance fees on original and reissue patents, except design or plant patents, based on applications filed on or after August 27, 1982. The distinction in the maintenance fee due based on the application filing date would be eliminated by section 4(a) of H.R. 1613. Section 4(d) of H.R. 1613 would eliminate the two-tier fee structure for the payment of maintenance fees. All would pay the same amounts.

Section 1.20, if revised as proposed, would delete paragraphs (h)–(j). The fees for maintaining all original or reissue patents, except design or plant patents, including those based on applications filed on or after August 27, 1982, would be set forth in paragraphs (e)–(g).

Section 1.20, if revised as proposed, would renumber paragraph (k) as paragraph (h), and adjust the fee amounts as authorized by section 4(a) of H.R. 1613. This paragraph would provide for a surcharge for payment of a maintenance fee during the six-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after December 12, 1980. Paragraph (h) formerly provided for a surcharge for late payment of maintenance fees on original and reissue patents, except design or plant patents, based on applications filed on or after December 12, 1980, but before August 27, 1982. Paragraph (l), which is proposed to be deleted, provided for a surcharge for late payment of maintenance fees on original and reissue patents, except design or plant patents, based on applications filed on or after August 27, 1982. Section 4(d) of H.R. 1613 would eliminate the two-tier fee structure for the payment of maintenance fees. All would pay the same amounts.

Section 1.20, if revised as proposed, would delete paragraph (l). The fees for the late payment of a maintenance fee for all original or reissue patents, except design or plant patents, based on applications filed on or after December 12, 1980, are set forth in proposed renumbered paragraph (h).

Section 1.20, if revised as proposed, would renumber paragraphs (m) and (n) as paragraphs (i) and (j), and adjust the fee amounts as authorized by section 4(a) of H.R. 1613.

37 CFR 1.21 Miscellaneous Fees and Charges

Section 1.21, if revised as proposed, would reserve paragraph (f) and delete paragraphs (p) and (q).

Section 1.21, paragraphs (a), (c)–(e), (h), and (l)–(n), if revised as proposed, would adjust the fee amounts as authorized by section 4(a) of H.R. 1613.

Section 1.21, subparagraph (a)(4), if revised as proposed, would provide a certificate of good standing for $10.00 and a certificate that is suitable for framing at double that fee amount.

Section 1.21, subparagraph (b)(1), if revised as proposed, would eliminate the fee requirement for reinstating a deposit account. This fee requirement has been found to be unnecessary because the Office no longer suspends accounts when there is no activity. The fee amount for establishing a deposit account would remain at $10.00.

Section 1.21, if revised as proposed, would delete paragraph (f), since this service would be provided under revised paragraph (j). Paragraph (f) would be reserved.

Section 1.21, paragraph (g), if revised as proposed, would establish a self-service copy charge amount, per page. The self-service copy charge would be applied to the per copy amounts on CopiShare cards as previously provided by this paragraph, and the marginal cost for each printed page generated from the Automated Patent System, as previously provided by paragraph (q).

Section 1.21, paragraph (j), if revised as proposed, would eliminate the fee for providing duplicate passes. The Office would continue to provide duplicate passes free of charge.

Proposed new paragraph (j) would establish one fee amount for each hour of service, or fraction thereof, requested from the PTO. Examples of services would be searching PTO records, as previously provided by this paragraph; PTO staff assistance to conduct a search using the Automated Patent System, as previously provided in paragraph (p); and other miscellaneous requests for services where PTO staff are providing direct labor support to customers.

Section 1.21, paragraph (k), if revised as proposed, would require the payment of the actual cost for performing special services provided by the PTO. Generally, services provided by the PTO would be charged at the $40.00 hourly rate set forth in paragraph (f) of this section. Paragraph (k) is reserved for non-labor charges, such as computer services, special supplies, extra mailing costs, etc., that are authorized by the customer.

37 CFR 1.24 Coupons

Section 1.24, if revised as proposed, would adjust the fee for the purchase of coupons for patents and trademarks to make it comparable to the fee required for the purchase of copies of patents and trademarks, and to adjust the amount of the coupon books.

37 CFR 1.26 Refunds

Section 1.26, paragraph (c), if revised as proposed, would provide for a refund of $2,250 if the Commissioner decides not to institute reexamination proceedings. The $2,250 refund would apply to those instances where the proposed reexamination fee of $3,000 under 37 CFR 1.20(c) was paid. The current $1,500 refund would be made in those cases where the current $2,000 reexamination fee was paid.

37 CFR 1.27 Statement of Status as Small Entity

Section 1.27, if revised as proposed, would clarify that small entity status is available only when paying the application filing fees, in accordance with section 4(d) of H.R. 1613.

Section 1.366, if amended as proposed, would revise paragraph (d) to delete reference to small entity status when paying maintenance fees, in accordance with section 4(d) of H.R. 1613. There would be no reduction in any maintenance fee paid after the effective date of these rules for small entity status.

Section 1.366, if amended as proposed, would delete paragraph (f) since it refers exclusively to a change in small entity status prior to, or at the time of paying, the first maintenance fee. Section 4(d) of H.R. 1613 would eliminate the two-tier fee structure for the payment of maintenance fees. All would pay the same amounts.

Section 1.366, if amended as proposed, would renumber paragraph (g) as paragraph (f), and eliminate the reference to § 1.28(a) since the small entity provisions would no longer apply to maintenance fees.

37 CFR 1.378 Acceptance of Delayed Payment of Maintenance Fee in Expired Patent to Reinstate Patent

Section 1.378, if amended as proposed, would revise paragraphs (a)–(c) and (e) to refer to renumbered paragraphs in § 1.20.

292-463 TMOG-91-2 – QL 3

proposed fee amount includes a reduction equivalent to approximately 20 percent of the cost of conducting a search.

37 CFR 1.740 Application for Extension of Patent Term

Section 1.740, paragraph (a)(14), if revised as proposed, would change the reference to the rule for extension of a patent term to § 1.20(j).

37 CFR 1.770 Express Withdrawal of Application for Extension of Patent Term

Section 1.770, if revised as proposed, would change the reference to the rule for extension of a patent term to § 1.20(j).

37 CFR 2.6 Trademark Fees

Section 2.6, if revised as proposed, would be divided into two sections. Revised paragraph (a) would include all Trademark process fees and revised paragraph (b) would include all Trademark service fees. Paragraphs (a) and (u) would be renumbered as subparagraphs (a)(1) and (a)(2); paragraphs (v), (b), (s), (c)–(l) would be renumbered as subparagraph (a)(4)–(a)(16), respectively; and paragraph (m) would be renumbered as subparagraph (a)(18). New subparagraphs (a)(3) and (a)(17) would be added.

Paragraph (n) would be renumbered as subparagraph (b)(1); paragraphs (o), (q), (r), and (w) would be renumbered as subparagraphs (b)(5)–(b)(8), respectively; and paragraph (t) would be renumbered as subparagraph (b)–(11). New subparagraphs (b)(2)–(b)(4), (b)(9) and (b)(10) would be added.

Subparagraph (a)(1), if revised as proposed, would adjust the fee amount established pursuant to the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), in accordance with section (g) of H.R. 1613.

Subparagraph (a)(2), if revised as proposed, would delete reference to filing an amendment for a statement of use. New subparagraph (a)(3) would be established for filing a statement of use under section (1)(d)(1) of the Act, per class. This would clarify that a $100 fee amount is due for each action requested.

Subparagraph (a)(5), if revised as proposed, would delete the words "an application" from the rule.

Subparagraph (a)(6), if revised as proposed, would clarify the requirement for paying an additional fee for a renewal application made within three months of the expiration of the registration. Subparagraph (a)(8), if revised as proposed, would adjust the fee amount established pursuant to the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), in accordance with section (g) of H.R. 1613.

Subparagraphs (a)(12)–(a)(16), if revised as proposed, would adjust the fee amounts in accordance with section (g) of H.R. 1613.

Subparagraph (a)(16), if revised as proposed, would delete reference to filing a notice of opposition. New subparagraph (a)(17) would be established for filing a notice of opposition, per class. This would clarify that the proposed $400 fee amount is due for each class requested.

Subparagraph (a)(18), if revised as proposed, would adjust the fee amount in accordance with section (g) of H.R. 1613.

Section 2.6(b), if revised as proposed, would establish that the Office would sell certified or uncertified copies of documents at the same flat fee. Most requests for documents are for certified copies. Customers who need uncertified copies of documents or copies of portions of documents also would be able to make those copies themselves for a self-service copy charge, per page. The Office no longer would compare and certify documents that were not made by Office staff.

Subparagraph (b)(1), if revised as proposed, would adjust the fee amount in accordance with section (g) of H.R. 1613, and would delete reference to a copy showing title and/or status. In addition, this subparagraph would clarify the levels of service available for obtaining printed copies of trademarks. In addition to regular service provided by subparagraph (b)(1)(i), the PTO would provide, in new subparagraph (b)(1)(ii), for expedited local service to be fulfilled within one workday for orders delivered to a Public Service Window at double the fee amount for regular service. There are two Public Service Windows at the PTO: One in the Patent Search Room and another in the Trademark Search Library. Unless otherwise requested, all copies of trademarks would be delivered to the Public Service Window in the Trademark Search Library. New subparagraph (b)(1)(iii) would establish a fee for providing expedited service for a copy of a registered mark ordered by electronic ordering service and delivered to the customer within two workdays.

Under proposed new subparagraph (2), the PTO would provide a certified copy of a trademark application as filed. In addition to regular service provided under (b)(2)(i), the PTO would provide, in subparagraph (b)(2)(ii), for expedited service fulfilled within five workdays, excluding mailing time, at double the fee amount for regular service.

Under subparagraph (b)(3), the PTO would provide certified or uncertified copies of trademark file wrappers and contents at the same flat fee amount.

Subparagraph (b)(4), if revised as proposed, would adjust the fee amount in accordance with section (g) of H.R. 1613, and would provide certified copies of registered marks, showing title and/or status, as provided under the current § 2.6(n). In addition to regular service provided by (b)(4)(i) at a fee, the PTO would provide, in subparagraph (b)(4)(ii), for expedited service fulfilled within five workdays from receipt of request in the Trademark Post-Registration Division, excluding mailing time, at double the fee amount for regular service.

Subparagraph (b)(5), if revised as proposed, would adjust the fee amount in accordance with section (g) of H.R. 1613, and would provide certified or uncertified copies of trademark records, per document, except as otherwise provided in this section, at the proposed flat fee amount. The Office no longer would certify documents that are not prepared by the Office, as is provided for in existing paragraph (o). Further, expedited services are now included as subparagraphs (b)(2)(ii) and (b)(4)(ii).

Section 2.6, if revised as proposed, would delete existing paragraph (p). A self-service copy charge is provided in subparagraph (b)(9) of this section.

Subparagraph (b)(6), if revised as proposed, would adjust the fee amount in accordance with section (g) of H.R. 1613.

Subparagraph (b)(7), if revised as proposed, would adjust the fee amount in accordance with section (g) of H.R. 1613, and would clarify that the fee amount charged would cover a search of assignment records and an abstract of title and certification.

Section 2.6, if revised as proposed, would delete paragraph (x). This service would be provided under proposed subparagraph (b)(9).

Proposed new subparagraph (b)(9) would establish a self-service copy charge, per page, and would be a replacement for the services offered in paragraphs (p) and (x) which are proposed to be deleted. The self-service copy charge would be applied to the per copy amounts on CopiShare cards, and the marginal cost for each printed page generated from the Automated Trademark System, as previously provided by paragraph (x).

Proposed new subparagraph (b)(10) would establish one fee amount for each hour of service, or fraction thereof, requested from the PTO. Examples of services would be searching PTO records, as previously provided by this paragraph, and other miscellaneous requests for services where PTO staff are providing direct labor support to customers.

Subparagraph (b)(11), if revised as proposed, would clarify that the services to be provided would be those that are not specified elsewhere in the statute or rules. Adding this language makes the wording of this rule comparable to § 1.21(k). Generally, services provided by the PTO would be charged at the $40.00 hourly rate set forth in subparagraph (b)(10) of this section. Subparagraph (b)(11) is reserved for nonlabor charges, such as computer services, special supplies, extra mailing costs, etc., that are authorized by the customer.

Other Considerations

The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96–354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. There are no information collection requirements relating to patent and trademark fee rules.

The PTO has determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the rule change would not have a significant adverse impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96–354). Since 1983, PTO has relied on fee income from patent statutory, patent non-statutory, PCT and trademark fees to partially fund its operating program. As a result of the Omnibus Budget Reconciliation Act of 1990, reliance on fee income has increased to 99.9 percent. PTO will recover approximately 76 percent of its budget from statutory patent fees, which are unchanged, and from the elimination of the small entity subsidy for many patent fees, which is required by the proposed legislation. Only approximately 24 percent of PTO's total budget for fiscal years 1992 and 1993 will be obtained from non-statutory patent, PCT and trademark fees. Since non-statutory patent fees are an adjunct to patent statutory fees (e.g., surcharges which can be avoided by timely paying fees and filing papers), it is anticipated that these fees will be paid primarily by other than small entities. Under PCT, fees are paid principally by U.S. nationals or foreign nationals seeking protection on the same invention in a number of countries. PCT is an alternative to filing separate patent applications directly in other countries. Most applicants for protection under PCT appear to be large entities. Less than 10 percent of the revenue generated over the two-year period will come from the payment of trademark fees. Small entities have the option of not registering their marks under the Federal system, but can choose to use their mark under common law. While the trademark filing fee has been increased from $175 to $250, the $175 fee was originally set in 1982. PTO has attempted to keep trademark filing fees as low as practicable to encourage small entities to enter the trademark system.

The PTO has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy would be less than $100 million. There would be no major increase in costs or prices for consumers; individual industries; Federal, state, or local government agencies; or geographic regions. There would be no significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

§ 1.27 Statement of status as small entity.

(a) Any person seeking to establish status as a small entity (§ 1.9(f) of this part) for purposes of paying filing fees in an application must file a verified statement in the application prior to or with the filing fee paid as a small entity. § 1.28 Effect on fees of failure to establish status, or change status, as a small entity.

(a) The failure to establish status as a small entity (§§ 1.9(f) and 1.27 of this part) in any application prior to paying, or at the time of paying, any filing fee precludes payment of the filing fee in the amount established for small entities. A refund pursuant to § 1.28 of this part, based on establishment of small entity status, of a portion of the filing fees timely paid in full prior to establishing status as a small entity may only be obtained if a verified statement under § 1.27 and a request for a refund of the excess amount are filed within two months of the date of the timely payment of the full filing fee. The two-month time period is not extendable under § 1.136. Status as a small entity is waived for any filing fee by the failure to establish the status prior to paying, at the time of paying, or within two months of the date of payment of, the fee. Status as a small entity must be specifically established by a verified statement filed in each application in which the status is available and desired, except those applications filed under § 1.60 or § 1.62 of this part where the status as a small entity has been established in a parent application and is still proper. Once status as a small entity has been established in an application, the status remains in that application without the filing of a further verified statement pursuant to § 1.27 of this part unless the Office is notified of a change in status. Status as a small entity in one application does not affect any other application, including applications which are directly or indirectly dependent upon the application in which the status has been established, except those filed under § 1.60 or § 1.62 of this part. Applications filed under § 1.60 or § 1.62 of this part must include a reference to a verified statement in a parent application if status as a small entity is still proper and desired.

(b) [Reserved]

(c) If status as a small entity is established in good faith, and fees as a small entity are paid in good faith, in any application or patent, and it is later discovered that such status as a small entity was established in error or that through error the Office was not notified of a change in status, the error will be excused if:

(1) Any deficiency between the amount paid and the amount due is paid within three months after the date the error occurred or

(2) Any deficiency between the amount paid and the amount due is paid more than three months after the date the error occurred and the payment is accompanied by a verified statement explaining how the error occurred and how and when it was discovered.

If the Commissioner accepts payment of the maintenance fee upon petition, the patent shall be considered as not having expired, but will be subject to the conditions set forth in 35 U.S.C. 41(c)(2).

(b) Any petition to accept the delayed payment of a maintenance fee filed under paragraph (a) of this section within six months of the expiration of the patent must include:

If the delayed payment of the maintenance fee is not accepted, the maintenance fee and the surcharge set forth in § 1.20(i) will be refunded following the decision on the petition for reconsideration, or after the expiration of the time for filing such a petition for reconsideration, if none is filed. The fee set forth in § 1.17(h) for filing the petition for reconsideration will not be refunded unless the refusal to accept and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Availability of PatentIn Computer Program Training for Portable Computer Owners

The Patent and Trademark Office (PTO) has developed a computer program, called PatentIn, that will facilitate compliance with the Requirements for Patent Applications containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures (sequence rules: 37 CFR 1.821 through 1.825). (Final rules were published in the Federal Register, 55 Fed. Reg. 18230 (May 1, 1990), and in the Official Gazette, 1114 O.G. (May 15, 1990).)

If there is sufficient demand, one or more one-day training sessions will be held on the use of the PatentIn computer program during the week of June 24-28, 1991. The training would be directed at practitioners who have portable computers capable of running PatentIn. (In order to run PatentIn, the computer must have an MS-DOS operating system, a hard disk with 2 megabytes of available storage, and 550K of available RAM). Electricial power hookups will be provided for portables requiring 120 volt AC power.

The training would be conducted at the PTO in Arlington, Virginia. It would include (1) the use of PatentIn to prepare the sequence listing file of information, and (2) the use of word proccessing software to prepare the PatentIn sequence listing file for inclusion as part of the application papers. Also included would be training on the basic file editing and manipulation skills that may be neccessary for preparing sequence information for importing into PatentIn.

Each session would be limited to 20 participants. Particiapants would be required to have PatentIn installed on their computers prior to the start of the session. Trademark Trial and Appeal Board "Brown Bag Lunch" Seminars

The Trademark Trial and Appeal Board is inaugurating a series of "brown bag lunch" seminars. The seminars will be informal lunch-time discussions with Trademark Trial and Appeal Board members and interlocutory motions attorneys. In each seminar, Board professionals will provide information on particular areas of Board practice and procedure and will respond to any questions posed by seminar participants.

The first seminar will be held on Tuesday, June 4, 1991, from 12:00-1:30 p.m., in the conference froom (lobby level) of the South Tower Building, 2900 Crystal Drive, Arlington, Va. The Board will discuss Trademark Trial and Appeal Board discovery practice and the prospects for adapting alternative dispute resolution techniques to Board proceedings. Seating is limited to approximately fifty (50). Please call Beth Chapman or Helen Wendel, after May 14, at (703) 308-9300, to reserve a place; and bring a brown bag lunch.

Trademark Automation

The U. S. Patent and Trademark Office (PTO) recognizes that effective and efficient automated trademark systems are of vital importance to successfully conducting the Agency's mission of examining applications for the registration of trademarks. To that end, the PTO is undertaking two programs designed to improve trademark data base quality and the trademark search and retrieval system.

Three separate activities are being planned to improve the trademark automated search and retrieval function. The PTO will implement improvements in the existing T-Search system to the degree that they are technically feasible and cost effective. One major step has already been taken, moving the search software to the PTO's Amdahl 5990 computer, which has resulted in reductions in search times of 20-30% and increased the number of simultaneous users that may be on the system. The PTO is also initiating an internal development project for an interim mark search system which will make maximum use of commercial off-the-shelf software and hardware components. This interim system will be developed based on selected features specifiifed in the Functional Requirements Document for a replacement search system. If the imterim mark search system provides improved service to users and is cost beneficial, it will be deployed in the trademark operation until a replacement for the existing T-Search system can be procured and installed in the PTO. Finally, the PTO is initiating a formal source selection process to replace the current T-Search system. This will be a contractor developed, government maintained search system meeting all search requirements specified in the Functional Requirements Document. Contractor resources will also be acquired to perform research on advanced search techniques that will be implemented if a technique shows an acceptable return on investment.

The general focus of the data base quality improvement program will be to clean up data that is presently available in trademark data bases, improve data base administration techiques to ensure that data being entered in trademark systems is of high quality, and develop an image file in an industry standard format.

Six specific activities will be undertaken over the next two to three years to accomplish this goal. The PTO will: (1) capture trademark images in CCITT Group IV format for use in the new search system; (2) improve documentation and training related to data entry and text editing work; (3) provide additional edit checks in existing systems to prevent entry of errors; (4) clean up approximately 61,000 potential spelling errors that have been identified in the six million words in the data base; (5) develop automated procedures for the entry of some "pseudomark" information used in T-Search to ensure consistency; and (6) clean up a number of potential errors that have been discovered in the data base using automated data checking techniques.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
